📍 Go Vap, HCM City 📞 0344248396

About

Passionate about front-end web development, with a creative mind and good problem-solving skills. I enjoy converting ideas into code. My current fields of study include front-end development, back-end development, and UI/UX design. My expertise is primarily focused on front-end development. My short-term objective is to become a software engineer within the next three years, and my long-term goal is to become an expert project manager.

Education

Sai Gon University   **September 2019 – 2023**
Major: Information Technology   *Ho Chi Minh City*

Language Skills: English (Can listen, read and understand documents in English)

Projects

UniBookSocial | *ReactJS, NodeJS, TailwindCSS, Framer motion*   **September 2023 - December 2023**
Role: Front-end Developer
Github: github.com/PhatJack/UniBookSocial
Tasks:

* I took charge of designing the layout and components, ensuring a cohesive and aesthetically pleasing visual identity for the project
* Leverage ReactJS and TailwindCSS, I skillfully translated design to concepts into a responsive and user-friendly interface, optimizing the user experience.
* I seamlessly integrated the frontend with the necessary APIs, facilitating data retrieval and interaction with the backend

Flow Delivery | *ReactJS, TailwindCSS*   **July 2023 - August 2023**
Role: Front-end Developer
Github: github.com/PhatJack/flower-delivery
Website: flower-delivery-delta.vercel.app
Tasks:

* Acquired proficiency in utilizing TailwindCSS to implement fully responsive designs and successfully configured Tailwind settings for optimal project outcomes.
* Demonstrated expertise in employing grid and flexbox techniques to achieve precise layout structures and enhance design flexibility within projects.

Achievements

University Scholarship   **2022 - 2024**

Experience

Front-end developer   **July 2024 – September 2024**
Freelancer   *Ho Chi Minh City*
